

Polyurea Development Association

Product Listing Program

In order to provide additional services to the membership and further the objectives of the PDA in becoming the source for information regarding polyurea technology, we are pleased to announce implementation of a new Product Listing Program. This program will enable PDA member formulator companies the ability to list products with PDA for publication on the Web site.

Listed products must conform to the current PDA definitions of “pure” polyurea and should be those products eligible for use of the “pure polyurea” label authorized by PDA. It is anticipated that listing of products will help serve various industry specifying professionals in identifying the highest performance systems available. It will also contribute to attainment of the PDA goal of becoming the primary source for information regarding polyurea.

Listing of products will be by application executed and submitted by member formulating companies. There will be an administration fee of \$100 payable to PDA to cover costs of archiving and website listing. Each product listing will last for two years and will be renewable upon submitting a new application and fees.

You are encouraged to consider listing your conforming polyurea products with PDA and for your convenience an application form has been included for your review and use.

Best regards,

Polyurea Development Association
